Create a new volume

Attach volume

mkfs.ext4 /dev/xvdc

mkdir /new-data

mount /dev/xvdc /new-data/

cd /data

mv * /new-data/

cd

blkid

vim /etc/fstab

UUID=   /new-data ext4 defaults 0 0

systemctl daemon-reload

unmount /data (if this not work use "umount -l /data")

df -h

lsblk

aws ->old disk -> detach volume ->delete volume
